Objective

A Technical Leadership position at a mission driven organization

Profile

I make things happen. I'm a tenacious tech entrepreneur with passion for blending engineering and quality design. My academic pursuits in engineering, industrial design, design research, and technology entrepreneurship have enabled me to create new solutions in diverse areas such as AI, fitness, robotics, and crypto. As a technical founder with experience in both startups and megacorps, I pride my ability to align cross-functional teams towards a common goal. Spending my formative career years in Japan, Milan, and Silicon Valley has shaped me as someone with a head for innovation, a commitment to excellence, and multinational perspective.

My Ventures

Co Founder: AI Ship | <https://aiship.co>

Miami, FL — 2022-Present

AI Ship started as a series of rapid-fire indie hacker AI projects, which turned into a community of AI Hackers, and an AI Enablement software dev collective.

A few of my rapidfire projects (links available upon request):

- Spiro.Studio : AI Interior Design
- InstaPet.Art: AI pics of your favorite pets
- ML-E : AI romantic matchmaker and date coach
- Askabot.xyz : AI replicas for podcasters, combined +3M reach
- Mouthful : Fast food ordering via AI transcription and interpretation
- HypnoGPT : AI that programs healthier habits into humans using hypnosis

Founder: Pollen | <https://pollen.cx>

Miami, FL — 2021-22

Pollen delivered affiliate marketing tools to the NFT ecosystem. Sold to Crossmint 3/22

- Crashcourse in web3 and crypto
- Identified market need
- Developed on-chain affiliate marketing software
- converted initial customer cohort

Founder: Arena | <https://arena.fit>

Los Angeles, San Francisco, CA — 2017-21

Arena (formerly W8X) is a consumer connected fitness company that uses an intelligent robotic drive system to automate high quality strength workouts.

- Developed proprietary fitness technology, including writing provisional patents, developing IP strategy, and filing full utility patents
- Established a hardware lab and personally built prototypes, drawing upon extensive background in electrical, software, and mechanical engineering
- Conducted customer research studies to better understand target audience and inform product development decisions
- Built team to lead electrical, software, and mechanical engineering efforts as Arena grew

Work

Chief Operating Officer, Crossmint

Miami, FL — 2022

Acqua-hired into Crossmint to assist with the formative stages of company building

- Worked with founders to develop and implement product roadmap, timelines, and hiring plan
- Navigated complicated compliance landscape for credit card NFT checkout product
- Corporate cleanup and structuring for multi-national (US / Spain) organization

R&D Engineer, Apple

Cupertino, CA — 2015-16

Intelligent robotic systems and engineering efforts within Apple's special projects division.

- Development of system simulation tools
- Safety critical architectures for decision making systems
- New concept ideation and prototyping
- 9 patents pending or issued

Software & Systems Engineer, Mission Motors

San Francisco, CA — 2013-15

Critical software and systems support activities towards customer centric EV and PHEV projects.

Exchange Researcher, Osuka-Ishikawa Laboratory

Osaka, Japan 2010

Research position developing AI systems capable of designing novel robot walking mechanisms. Osaka University "Best Presentation Award" recipient

Fun

BattleBots TV Show, Team Complete Control

Redwood City, Seasons 1 and 2

Aided in the concept creation, design, fabrication, and driving for robot *Complete Control MKV* which competed in seasons 1 and 2 of ABC's BattleBots.

Education

University of California at Santa Barbara

B.S. College of Creative Studies 2011, Emphasis in Computer Science

SAE, JSAE (Japan), and IEEE Student affiliations

IEEE Student Branch Chair

Directed for-credit Intro to Microcontrollers course

Stanford Continuing Studies

Technology Entrepreneurship by Chuck Easley, Parts I & II

Design Research: Creating New Products and Market Success by Christopher Ireland

Scoula Politecnica di Design

Six months of post graduate studies in a program intended to educate engineers on design principles. Focus in automotive and industrial design

Action PT Personal Training

2018 NCCS accredited program in personal training

Emphasis in exercise and nutrition
